Cairo, Egypt

### Work Experience

Backend Contractor

### Rawd As-Saleheen Bi-Lingual School

August 2022 – Present Remote

 Integrated multiple services into the application (e.g.: MyFatoorah, FCM, SendGrid, SMSBox, and Google Drive).

- Enhanced database performance by applying appropriate indexes to optimize the execution time.
- Implemented Puppeteer automation to generate invoices and reports.
- Technologies Utilized: JavaScript, ExpressJS, MYSQL, Sequelize

#### **School Management System**

July – December 2021

Remote

Software Contractor

- Migrated the access VBA application to ElectronJs
- Host the database on a remote cloud provider to ease collaboration.
- Technologies Utilized: JavaScript, ElectronJs, PostgreSQL, Sequelize

#### **Education**

### Bachelor of Engineering | Systems & Biomedical Engineering

Cairo University

Graduation Project: Psy-Awareness

September 2017 – July 2022

#### Relevant Coursework

-Database Engineering -Computer Networking

—SW for HW Interfacing -Machine Learning

-Computer Architecture -Digital Signal Processing

-Data Structures & Algorithms

-Bio-Statistics

-Computer Graphics

# Training & Certificates

# Sprints iCamp Internship (Training) 6

July 2021 – October 2021

Remote

Sprints & NAID

TIEC - ITEDETA

- A 45-Day Intensive Training Program
- The graduation project was an application to review the accessibility of different places in a country
- Technologies Utilized: HTML, CSS, JavaScript, Angular, NodeJs, ExpressJs, MongoDB, Mongoose

## Entrepreneurship Training - InnovEgypt &

August 2020

Remote

• A Six-day intensive hands-on training about the main principles of entrepreneurship

### </> Projects

### Psy Awareness | Graduation Project 🗘

September 2021 – June 2022

Backend Developer

Graduation Project

- Developed a comprehensive full-stack application that targeted mental health challenges in Arab society.
- Key Features:
  - Appointment Booking System: The user can navigate through the system and pick a doctor, read reviews about him/her, and schedule an (online/offline) session.
  - Public Health Questionnaires: User can take one of the acknowledged mental health questionnaires for free (e.g.: Taylor Manifest Anxiety Scale and MMPI)
- Technologies Utilized: ExpressJs, MongoDB, Docker, Postman, Socket.io

ChatApp 
April 2024

• A real-time chat rooms app with functionalities to (create rooms and chats, partially search chat messages)

• Technologies Utilized: Ruby on Rails, MySQL, Sidekiq, ElasticSearch

Kabsa 🖓 Augest 2024

• A simple and lightweight tool to log key presses and WPM (Words Per Minute) in real time.

• Technologies Utilized: Go, Goroutines, SQLite

Topology API (7) May 2022

• A Simple REST API to handle Microelectronics' topology.

• Technologies Utilized: Java, SpringBoot, Gson, Junit, Maven

## Radiology Information System 🗘

Jan 2021

- A full-stack Radiology Information System (RIS)
- Technologies Utilized: Flask, SQLAlchemy

### ICU Real-time Monitoring System 🖓

April 2022

- A RESTful API and WebSocket server for Intensive Care Units (ICUs) devices in a hospital.
- Technologies Utilized: JavaScript, websockets, ExpressJs, sqlite3

Autonomous Car 🔾 March 2022

• A Two-mode car (Pilot and auto-pilot) using WebSocket to connect the Mobile Camera, ESP Module, and a mobile application to control the car.

• Technologies Utilized: JavaScript, WebSockets, Python, OpenCV

Music Equalizer 
April 2021

- Developed a Music Equalizer utilizing Python's Numpy math library & PyQt5 GUI library for enhanced audio control.
- Created a spectrogram of the audio file for visual analysis and enhancement.
- Keywords: Audio processing, GUI Development

## Bio-Medical Image Compression 🖓

May 2020

- A Command Line Application for Lossless Image Compression using Huffman Coding Algorithm
- Technologies Utilized: C++, CMake, Huffman Coding
